

Spire

South Bank Hospital

Do you suffer with hip or knee pain?

Get back to what you love **faster**

New minimally invasive hip replacement

New minimally invasive hip replacement technique spares muscle damage so you can get back to normal activities faster.

- Shorter hospital stay
- Faster recovery
- Less pain than traditional hip replacement surgery
- Can often walk on the day of surgery
- More rapid return to full activity

Mr Nadim Aslam

Orthopaedic Surgeon BMSc, MBChB, FRCS(Eng), FRCS(Orth), MFSEM(UK)

Come along to a free event with Consultant Orthopaedic Surgeon Mr Nadim Aslam at the Lifford Memorial Hall, Broadway.

You can hear about the new treatment along with traditional surgery methods, and you will also have the opportunity to ask questions.

Meet the experts

Mr Aslam is one of a small number of Orthopaedic Consultants in the UK currently performing minimally invasive hip replacement surgery.

“My patients who have so far opted for this technique have seen great results. Their stay in hospital was shorter, their recovery time has been much quicker, and they walked unaided within a matter of days.”

19
Sept

Hip and knee patient information event, 7pm
Consultant Orthopaedic Surgeon, Mr Nadim Aslam
